Temporary Headquarters—

RAY HYATT'S GARAGE.

### Inga Council Nominations.

The nominations for the filling of the Inga Council Board was held at Duffield on Saturday with results as follows—

Division 2—G. H. Shaw,

Fred Krye and C. B. Barons.

Division 3—Ed Tattersall

and A. H. Schjucke.

Division 5—R. W. Faulks

and R. C. Howatt.

The elections will take place

on Saturday, Feb. 27th in

each of the three divisions.

The Polling booths are as

follows—Division 2, Luck-

now School house, Division

3, C. W. Ihsen's Residence,

Division 5, Ruthenian Hall

at Carvel.

Perpetrating Problems—Who is

going to be our next Town Pope?

The Girls' Club will hold a big Masquerade Dance in Ducholke's Hall on Friday, March 19. Everybody dress up their best as some swell prizes will be given. Meredith's Orchestra, Edmonton will be in attendance.

**Corns? here is relief**  
**Dr. Scholl's**  
**Zino-pads**  
*Put one on—the pain is gone*

For quick and lasting relief from corns, calluses, and bunions, there's nothing like Dr. Scholl's Zino-pads. Healing starts immediately, while the tender spot is protected against pressure and irritation. They are thin, adhesive, waterproof. Antiseptic. (Keep absolutely safe!)

PAUL WERNER,

### LOCAL NEWS.

Mr. Ben W. Johnson of Edmonton was in town on Monday, renewing old acquaintances.

Mr. A. E. Michael was in attendance this week at the Ramley school in Calgary.

Miss R. Wolfe of Edmonton spent the week-end at her home in Stony.

Mrs. Paul Werner was taken into an Edmonton Hospital last Friday to undergo an operation.

Mr. J. A. Barrie of Edmonton was a Sunday visitor in Stony.

Mr. E. C. Schmidt has moved his residence to the tenements above the Cash Store.

Miss L. Wolfe, who has been spending holidays with her parents here, left on Sunday for Klamath Falls, Wash. to resume her duties as Superintendent of the General Hospital.

Mr. Hy Ulmer holds his big clearance Sale today at his place south of town. Mr. Ulmer has sold his farm to Joe Hennig and he will leave next month with his family for the coast where they will reside. The trip will be made in his new Wyllis-Knight Sedan.

Mr. Finner has purchased a quarter section of land at Junkins and he will move up next week to his new premises.

The W. I. held a very successful card party at the home of Mrs. R. M. Galtway on Friday night.

Mr. R. Speakman is holding an Auction Sale at his farm 6 miles west of Stony, on Monday, March 1st. Mr. Speakman will move to town where he will handle Star cars and Cockshutt Farm Implements.

Mr. O. G. Wudel of Wetaskiwin has purchased the Implement business and residence from Mr. M. Ducholke and he will take over the concern in the early part of next month. The price paid is stated to be around \$6000. Mike is going back to the farm, having bought Joe Getzinger's half section of land at the Grove.

Red Rose Orange Pekoe is extra good. Won't you try it this time?

### Canada's "Inferiority Complex"

A prominent Canadian, addressing a meeting in New York recently, deplored the "inferiority complex" of the people of the Dominion. In other words, the national tendency to detract from the progress and achievements of Canada, to belittle its growth, and question its possibilities. Too many people in Canada are found who constantly compare a given set of conditions, or services, in this country with the much more populous and wealthy United States, or the older-established countries of Europe. It is no doubt true that Canada should set a high standard of comparison for their country, rather than a low one, but it is hardly fair to place in contrast a country of ten million people with one of one hundred and ten million people.

Canadians are declared to be "slow but sure and reliable." We believe that the people of this Dominion have justly established for themselves the reputation of reliability. We may lack the dash, the enthusiasms, the boastfulness of our neighbors to the south, and no doubt it would be to our advantage if some of their enthusiasm and energy were injected into our national make-up. Our southern neighbors would probably be better off with a little less of such national characteristics just as Canadians would be better off with a little more.

The year of 1926 would appear to be an excellent one in which to develop more of the spirit of national self-confidence in Canada. Following the splendid crop returns of last fall, the new year opened with expanding business in almost every direction, and the making of plans for large and important advancements in practically every branch of industrial and commercial activity during the year. The financial health of the Dominion is better than at any period since before the war; unemployment is less, and an optimistic tone prevails. This should be the normal state of affairs in this country, and it can be maintained if the people of Canada unitedly determine that it shall be maintained.

Canada's wheat crop last year was the second largest in its history and more than 150,000,000 bushels greater than in 1924; the oats crop was greater by more than 100,000,000 bushels; barley by 25,000,000 bushels. The ports of Montreal and Vancouver established new high records for the export of grain. Butter production in the three prairie provinces, which was below 9,000,000 pounds fifteen years ago, exceeded 10,000,000 pounds last year. Foreign trade is expanding rapidly, and the favorable balance of exports over imports now reaches to almost \$300,000,000.

In the face of such official figures, why should any Canadian feel called upon to apologize for his country, or to doubt its future? There has been talk of hard times in Canada, and unquestionably some recent years have been trying and difficult, but such conditions have existed in most countries. Not long ago that student of world affairs, Sir Clifford Sifton, stated with absolute conviction that man for man no country in the world was better off than Canada, and in no country there existed better opportunities for the man or woman willing and eager to work.

The year is yet young, but already in different sections of the country contracts for more new building have been let than in usually the case by mid-summer, and announcement of new and large undertakings is now the order of the day. Only recently one of the big railway groups in England announced the placing of an order in Canada for 26,000,000 feet of British Columbia Douglas fir for railway ties, an order which exceeds in quantity the whole of British Columbia's export to the United Kingdom two years ago. The Admiralty has decided to use Douglas fir for the decks and bulkheads of future battleships, and the British Board of Trade will use the same material for its motor boats and lifeboats. In two years British Columbia's export of timber has risen from 16,000,000 feet to 56,000,000 feet to 1925.

These facts are cited, not in a spirit of boastfulness, but as concrete evidence, as substantial reasons, why Canadians should altogether abandon that "inferiority complex" which they are criticized and which does act to retard the development of the Dominion and to create a lack of confidence, and a self-depreciation, which is inimical to the welfare of Canada. Let 1926 see this weakness in our national make-up buried forever.

#### Goals of Firms

People in the Maritimes are calling Sir Henry "Tremont" in reference to Canada. And Sir Henry's response, observes the Kingston Whig, is a contract to purchase 192,000 tons of Nova Scotia coal for the C.N.R. That is his way of heaping coils of fire on the heads of his detractors.—Toronto Globe.

#### No Trouble to Catch Shark

Dr. S. K. Maxwell, head of the department of zoology at the University of California, had urgent need of a live shark with which to demonstrate certain principles of the law of equilibrium. He appealed to the student employment bureau and a junior, Arthur Cowell, produced one after a few hours' fishing.

#### Record Baggage Handling

Checked Four Million Pieces of Luggage With Loss of Only Eleven Pieces

Handling 4,000,000 pieces of baggage in a year with a loss of only 11 pieces, is the record established by the baggage department of the Canadian Pacific Railway westward from 1925. There was also a decrease in the amount of claims of twenty-five per cent. from those of 1924, bringing the actual amount paid out to less than \$500 dollars.

### "DIAMOND DYE" ANY GARMENT, DRAPERY

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades of dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, sweaters, draperies, coverings, hangings—everything.

Buy Diamond Dye—no other kind—and fill your druggist whether the material is wool or silk, or whether it is linen, cotton or mixed goods.

#### Will Produce Artificial Silk

Artificial silk to the extent of ten tons a day will be produced by a German firm of manufacturers. Erection of the factory which will operate according to the new process is being hurried forward.

### HER IMPROVEMENT WAS REMARKABLE

Weak and Run-Down—Restored by Dr. Williams' Pink Pills

"Two years ago," says Mrs. L. Wright, Secreston, Sask., "I was very much run-down in health. I suffered from indigestion, sick headaches and sleepless nights. Fatigue would often come over me and I would have to lie down all the time. I was not long after that I could not walk any distance or do anything that required much exertion, without feeling completely worn out. As I was constantly growing weaker, I consulted a doctor who told me I was anemic and needed building up. I took several bottles of tonic he gave me, but the help I got from it was only temporary. One day, I decided to try Dr. Williams' Pink Pills, which I had used in childhood with success. It was not long after I began using them that I knew I had at last found the right medicine. I think I took altogether some fifteen boxes, and the improvement was remarkable as I was feeling as well as ever I had been, and my good health has continued to this day. I had also been troubled at times with rheumatism, and this as well as my other troubles disappeared. I have since recommended Dr. Williams' Pink Pills to neighbors who have used them with equally good results."

All weak, anemic women and girls should follow the example of Mrs. Wright, and give these pills a fair trial. New health and new strength is sure to follow. You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Turkish Women Enter Industrial World

Over Twenty Thousand Have Found Employment in Last Four Years

There was not one Turkish woman among the industrial workers of Constantinople four years ago, but now there are more than 20,000. A Turkish tobacco concern, the Douhan Society, led women into industry when it opened a factory in 1921 with the employment of 850 Turkish girls.

Turkish women have proved so adept at the sorting and grading of tobacco leaves that now this society employs 8,000 women. Other companies have sprung up and increased female employment. Comfort and health of the workers has been insured.

#### Cattle Killed By Wolves

During the past year, 80,000 cows, horses and sheep were killed by wolves in the Akroinik district, entailing a loss of \$250,000. Special detachments of local hunters and troops are trying to destroy the beasts.

Milner's Liniment used by Veterinarians

W. N. O. 1927

#### Alberta Oil Development

Royalty Company Now Producing Five Hundred Barrels Daily

After spending more than four million dollars in exploration work, the Imperial Oil Co., Ltd., has at last obtained a crude oil supply in Canada. It was reported by President C. O. Stillman at the recent annual meeting of the company in Toronto. In its address to the shareholders, Mr. Stillman said one well in Alberta operated by the Royalty Oil Company, a subsidiary of the Imperial, was now producing 500 barrels daily and showed no signs of diminishing. More wells, he said, were being drilled by the Royalty Company in Turner Valley, Alberta, in which district the company was hoping for greater success. The company was also delivering about 14,000,000 feet of gas daily to Calgary.

#### Where Liquor Money Goes

More Money Spent On Liquor In Alberta Last Year Went to Ottawa

More money spent on liquor in Alberta last year went to Ottawa than remained for Alberta's own treasury, according to the report of the liquor board now submitted to the government. Over \$2,128,000 was paid to the Dominion Government in 1926, representing customs and excise duties on liquor and spirits, taxes on beer, excise on malt, and sales taxes on the various products sold.

No reduction in the duty charged by the Dominion Government was made during the year, and there is little prospect, says the report of any material lowering of present retail prices until such reduction is given effect.

#### Canada's Trade Grows

Trade Within the Empire Shows Heavy Increase

Canada's active participation in trade and commerce within the empire is revealed in the trade statement for the year 1925; issued by the bureau of statistics. In both imports and exports, Canada has increased her business with the rest of the empire. The imports from other sections were \$197,000,000 in 1925, \$190,000,000 in 1924 and \$204,000,000 in 1925. In the same three years exports to British possessions were \$436,000,000 in 1925, \$444,000,000 in 1924 and the new peak of \$507,000,000 last year.

Persistent Asthma. A most distressing characteristic of this debilitating disease, is the persistence with which recurring attacks come to sap away strength and leave the sufferer in a state of almost continual exhaustion. No wiser precaution can be taken than that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most potent remedy for eradicating the disease from the tender air passages.

#### Donation From Indian Ruler

Impressed by the Armistice Day services, the Begum of Bhopal has sent her check for \$25,000 to the British Legion appeal fund. Her two small grand-daughters also assisted the fund by selling poppies in the streets.

The most obstinate corns fail to resist Holloway's Corn Remedy. Try it.

#### Homes In Irrigation District

More than three hundred and seventy-five home units have been established in the Lethbridge Northern Irrigation Block in Southern Alberta since its inception a few years back.

Carry it always with you!

WRIGLEYS

Keeps teeth clean, breath sweet, appetite keen and digestion good.

Great after smoking

After Every Meal

Flax Planted in England in 1532. Flax was first planted in England in 1532, when it was directed to be grown in order that material might be provided for the making of fishing nets. In 1783 bounties were paid to growers of flax in order to encourage its cultivation.

### The Family Remedy For Over Forty Years

So Says British Columbia Lady of Dodd's Kidney Pills

Mrs. E. Callier Suffered From Pains in her Back and is Now Completely Relieved.

Vancouver, B.C.—(Special).—"I can truthfully recommend Dodd's Kidney Pills," so states Mrs. E. Callier, 217 11th Avenue East. In an interview, "I was doubled up with pains in my back, but after taking Dodd's Kidney Pills I have not felt a pain in two years. My father always kept them in the house, as he was subject to lumbago. He always felt relieved of his pains. We have used Dodd's Kidney Pills in the family for over 40 years. I hope Dodd's Kidney Pills will do others as much good as they have done our family."

Statements like this have built up and maintained the reputation Dodd's Kidney Pills hold today.

You will find that Dodd's Kidney Pills will relieve kidney trouble, no matter where or in what form it is found.

#### France Growing More Wheat

It is assumed that in a few years France will be producing enough wheat to take care of its requirements. At present the production is nearly 90,000,000 quintals more. A quintal is about 220 pounds. Most of the wheat grown in France, however, is of the soft variety, and it may have to import hard wheat for some time yet.

Milner's Liniment used by Veterinarians

W. N. O. 1927

## Greater Industrial Development Shown Within Recent Years In The Western Provinces

Of recent years, and evidenced most markedly in 1925, there has been pronounced activity in Western Canada in the direction of achieving a greater industrial development, principally through the exploitation and utilization of the wealth and variety of the natural resources the area possesses. This broad territory is commonly regarded as being purely agricultural, dependent entirely upon the east and other countries for its manufactures, and whilst it is true that the great bulk of its revenue is derived from farming, with manufacturing a relatively unimportant phase of its economic life, there is, at the same time, a steady industrial expansion evident and Western Canada is consistently coming to manufacture a larger share of its fabricated requirements.

These various provinces being so essentially agricultural, the manufactures from farm products are naturally the ones which have been developed first and most actively. In all three provinces flour and grain mills constitute the greatest industrial activity. Slaughtering and meat packing occupies second place in Alberta and Manitoba, but in Saskatchewan butter and cheese manufacture has second place, whilst it is third in both sister provinces. In British Columbia, resources differ drastically, and the magnificent woods of the province have made lumber its first activity and pulp and paper its second, with fish, preserved, at third place with an almost equal importance. The other leading industries of the various provinces are cotton and hosiery, electric light and power, bread, biscuits and confectionery, coffee and spices, printing and publishing, saw, door and planing mills, malt liquors, aerated and mineral waters, and lumber, hats and shingles. British Columbia's fourth industry is electric light and power, followed by slaughtering and meat packing, fruit and vegetable canning, sheet metal products, saw, door and planing mills.

Vancouver has become the first industrial city of Western Canada with a production value of \$11,221,995, followed closely by Winnipeg with a value of \$7,647,027. These two cities are outstanding, and Calgary, which occupies third place, has an annual manufacturing production value of only \$3,171,249. St. Boniface, Regina, Edmonton and Victoria have each a production in excess of \$1,000,000, and Moose Jaw, Saskatoon, Medicine Hat and New Westminster in excess of \$500,000. Other important manufacturing cities are Brandon, Portage la Prairie, and The Pas in Manitoba, Prince Albert, North Battleford, Yorkton and Weyburn in Saskatchewan, Lethbridge and Redcliffe in Alberta, and Prince Rupert, Fernie, Merritt and Nanaimo in British Columbia.

Efforts towards industrial expansion in Western Canada have been very much more marked and become much wider in scope since the last survey was made by the government, and developments of a magnificent industrial nature have taken place. Beet sugar manufacture has been inaugurated in Alberta, and oil refining is steadily becoming a more important activity as the crude product is drawn from the Montana field, whilst more successful results are confidently awaited in Alberta and Saskatchewan. In the same province the manufacture of cereal straw into paper pulp has at last reached the stage of actuality, and there would seem to be very little probability that very soon the thousands of the Athabasca will be variously utilized. Sodium sulphate deposits in Saskatchewan have been put on a commercial basis and the product is being shipped east, and sulphate-leaching effect continues in the matter of utilizing the province's resources of lignite. Altogether there is evident in Western Canada a very marked determination to expand industrially through the exploitation and development of the great wealth and variety of the natural resources of that area.

Her incentive

Clergyman (to 2-year-old Nellie): And what do you go to Sunday School for, my dear?

Nellie: To see Tommy Jones.

W. N. U. 1617

## Favorable Trade Returns

Canada's Exports Now Four Times Larger Than in 1910

Thirty-six times unfavorable and twenty-two times, favorably, Canada's trade balance has annually stood since Confederation in 1867, according to W. McI. Clarke, director of the Canadian commercial intelligence service. Sales over purchases, when all is added together, however, represent a gain of exports over imports of almost one billion dollars. Physical expansion of Canadian exports is indicated in wheat exportations being four times larger in volume today than in 1910; flour, wood pulp, bacon, hams and whiskey, three times larger; condensed milk and butter, seven times greater; oats, 13 times larger; barley, 15 times; rye, 54 times; automobiles, 200 times; and sugar 3,500 times.

Canada's total trade in 1925 was \$2,161,000,000, as against \$200,000,000 more than in 1924. Imports last year were \$380,000,000, an increase of \$22,000,000. Exports (Canadian) in 1925 were \$1,781,000,000, an increase of \$213,000,000. Foreign merchandise exported from Canada last year amounted to approximately \$12,000,000. The favorable trade balance of \$382,000,000 for 1925, says the bureau of statistics, has only been exceeded on one occasion, viz., 1917, when it amounted to \$587,000,000.

## Trained Farmers Coming

Britishers Instructed in Elementary Farm Work to Migrate to Canada

Forty men, who have received six months training in elementary farm work under the auspices of the overseas settlement committee at a training centre near Ipswich, will emigrate to Canada about the middle of March, according to a dispatch received from London, England. This is the first batch of recruits that will migrate to Canada under the plan of the overseas settlement committee, under which inexperienced men are given training in the farm methods of the country to which they prefer to emigrate, before leaving England.

Wheat Shipment to Vancouver Exports of wheat from Alberta to Vancouver are expected to reach 50,000,000 bushels in the 1925 crop shipping season. The Canadian Pacific Railway is moving about 2,000,000 bushels a week to the Pacific coast.

Heavy Wheat Yield According to reports at Calgary, John Dewart, a farmer of the Jordan district, threshed 1,560 bushels of wheat from 30 acres, an average of 52 bushels to the acre.

## Indications Point To More Attention Being Paid To The Poultry Industry In Canada

### Where Hard Wheat is Grown

Canada and Northern Europe Greatest Producers of Wheat

That Canada and Northern Europe are the great growers of wheat, and that the United States will never be able to equal their yield per acre, was the statement of Dr. F. E. Baur, director of the soils department, Ohio State University, speaking to the National Crushed Starch Association in Montreal recently. Although Canada's output of wheat is still far below that of the United States, it must be remembered that only a small percentage of the arable land in the Dominion is under cultivation, and when the acreage planted to wheat in Canada is equal to that of the United States, there is little doubt but that the Dominion's wheat yield will more than exceed that of the United States.

### Canadian Farmer's Income

Average Income For 1925 is Placed At \$1,500

The average income of the Canadian farmer during 1925 was \$1,500, according to Dr. J. H. Griedale, federal deputy minister of agriculture, speaking at the New Brunswick Farmers' and Dairywomen's Association, which he stated compared favorably with the average income of the Canadian in other trades and professions. This represented the distribution of the 1,500 million dollars valuation of the 1925 farm products among the million farmers of the Dominion.

### Butter Exports

Heavy Increase is Shown For 1925 Over Previous Year

Exports of butter from Canada during the twelve months ended December 31, 1925, were 26,646,556 lbs., as against 22,843,539 lbs. for the previous twelve months, according to a report of the Dominion external trade branch. In addition 4,077,487 gallons of cream were shipped from the Dominion to the United States during the year, as compared with 2,538,822 gallons in the calendar year of 1924.

Hewitt: "He isn't much of a talker."

Jewell: "No, compared with him an oyster is a talker."

The baby chick industry in Canada, whilst still in its infancy, is advancing by leaps and bounds, according to the poultry division of the federal department of agriculture. During the past season many of the breeder hatcheries more than doubled their capacities, according to the same authority, and the prospects are that the same will take place within the coming year.

Ontario and British Columbia are the two provinces where the hatchery business is being carried on in a fairly large way. In the past the industry has suffered a great many trials incidental to a new industry setting on its feet and achieving its initial growth, but according to experts it is now more or less stabilized and standardized. One authority states that the hatchery business is a thousand times safer today than ten years ago. Shipping methods are highly satisfactory, hatching devices are perfected, and the public has been educated to the economic advantages of "ready-made" chicks. It is generally agreed that the hatchery industry is due for considerable growth and offers great possibility to the experienced.

That markedly greater attention is being paid to the poultry industry of the Dominion is evident in increasing population in many, very provinces, and outstanding in the cases of Ontario and British Columbia. The import of eggs would seem to be on the decrease, but there is still apparent considerable opportunity for the development of export trade. Whilst Canada has been purchasing eggs from the United Kingdom, United States, China and other countries, she has shipped heavily to the United Kingdom and to the United States and Newfoundland, whilst Canadian eggs have gone in smaller quantity to Bermuda, St. Pierre and Miquelon and other countries. There is evident opportunity to expand the Canadian poultry industry both to eliminate the import trade and to hold and further expand the export business already built up.

An example of what can really be achieved in the poultry industry is furnished by the province of Alberta, which in a few years changed from an importing to an exporting territory, and now claims second place among the provinces of the Dominion in poultry per farm with an average of 80 head. The province last year exported some 60,000 cases of eggs; the bulk going to England and Scotland. Live poultry handled by commercial houses in Alberta last year amounted in value to \$3,120,000 and eggs marketed to \$5,900,000. One method of encouraging the poultry industry has been the establishment of a provincial hatchery which last year shipped more than 14,000 baby chicks into every corner of the province.

## Valuable Mineral Discovery

Only Known Deposit of Lithium Minerals in British Empire Are in Manitoba

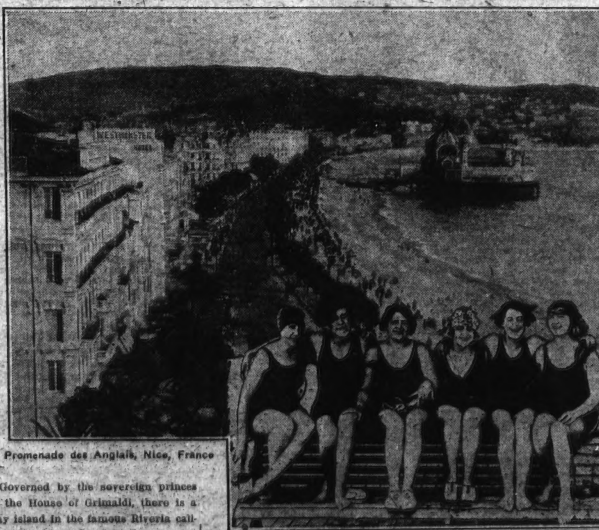

The only known deposit of lithium minerals in the British empire having possible commercial value lies, according to Dr. J. P. Wright, of the geological survey, within the province of Manitoba. In July, 1924, an outcrop of massive lepidolite was discovered about one mile south of Winnipeg River and 10 miles east and a little north of Pointe du Boe. Within the last six months geologists and mineralogists and a number of other rare minerals have also been identified in this locality. It is believed that future prospecting will uncover other similar deposits in Southern Manitoba and Western Ontario.

### Many Settlers Coming

Five thousand settlers are in sight for Canada this year under the land settlement scheme, according to Major John Barnett, chairman of the settlement board. The majority of the settlers will come from Great Britain and will be prepared to take root in Canadian soil, as whole families will come out together. Major Barnett said.

Woods statisticians have called the day "the last settlement of the west," for as many as 6,000,000 people have been found in the body of a single insect.

## Empress of Scotland at Nice

Promenade des Anglais, Nice, France

Governed by the sovereign prince of the House of Ormaldi, there is a tiny island in the famous Riviera called Monaco which has been the resort of all fashionable Europe for ages. Washed by the blue waters of the deep blue sea, periodically bathed in glorious sunshine, the beautiful cities of the little principality are favorite health resorts in winter and bathing places in summer.

World Cruise Monarch Taking Sun Bath

In Nice, France, in the famous Promenade des Anglais, where, it is said, if one waits long enough under the shade of one of the tiny trees, one may meet almost every American in the world who must pass that way at one time or another. The Canadian

Pacific liner Empress of Scotland, making a cruise around the world this year, recently dropped anchor in the bay opposite the Monte Carlo Casino. The passengers were taken to Nice by motor where they spent a happy day sightseeing.

## WORLD HAPPENINGS BRIEFLY TOLD

New York's snow removal bill this winter has reached the unprecedented total for February of \$5,400,000.

Charles McLeod, one of the oldest members of the Massey Harris Company's organization, died recently at his residence in Toronto, aged 85.

The department of overseas trade is considering the probability of promoting the production of raw silk with in the British empire.

That the board of grain commissioners has decided to install an appeal board in the city of Edmonton, is the information received by the board of trade from the secretary of that body.

It is stated in London, though there is no official announcement to the effect, that the Prince of Wales is shortly to commence regular work at Buckingham Palace assisting the King in the daily business of government.

The inhabitants of the Christian village of Maruneh near Damascus, to talking about 40, were massacred by a native band, described as composed of brigands. Maruneh is 55 miles northwest of Damascus.

More than 250 persons are seriously ill with influenza and twenty deaths from the malady have been reported in Dallas, Tex., statistics showed. Thousands are suffering from an influenza form of the disease.

Canadian trade continues to go ahead. In the ten months ending January, according to returns from the customs department, total trade was \$1,881,000,000, an increase of \$216,000,000 over the corresponding ten months of the previous fiscal year.

**Stop the Cough.**—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

**Banff Tourist Trade.**—Over 21,000 tourists passed over the Banff road, at Banff, during the past season, according to figures compiled by the superintendent of the Banff National Park, which was an increase of about 30,000 over the previous season.

## Reginald Frank Stone

—Baltimore Studio  
St. Catharines, Ont.—"During my first expectant period I was in very poor health, was very nervous, suffered from morning sickness, had backache and abdominal pains. I was as miserable as could be. My friend I learned of Dr. Pierce's Favorite Prescription, and after I began taking it I got along fine; it relieved me of the morning sickness, pains and distress through my back and sides and I grew well and strong. Was able to do my own work the remainder of the time. I experienced very little suffering and had a fine healthy baby, who has never had a day's sickness except slight colds. I was very glad to know of a medicine so valuable in the 'Prescription' proved to be—Mrs. Reginald Stone, 68 Haynes Ave. All dealers.  
Send 10 cents to Dr. Pierce's Laboratory, Bridgeport, Ont. if you wish a trial package of tablets.

## Woman Is Veterinary Surgeon

Irish Girl Only One Practising Profession in United Kingdom.  
It is strange to hear of a profession that is not overcrowded; it is stranger still to be told that there is only one woman veterinary surgeon in the kingdom. This is Miss Aileen Curt, daughter of the late Sir Leopold Curt, who began practicing in Ireland and soon had such a big practice that she required four horses to cover her country. She has now settled on the borders of the New Forest.

## Joint Stiffness Goes, Swellings Disappear, Pain Is Subdued

No Liniment Gives Such Universal Satisfaction As

## NERVILINE

It is the great penetrating power of Nerviline that makes it so efficient in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief at once. No liniment compares in pain relieving power with Nerviline. For the minor pains and aches that arise in every family, Nerviline should always be kept handy on the shelf. Use it for Rheumatism, Lumbago, Neuralgia and Colds. 50 cents at all dealers.

**CLIPSE FASHIONS**  
Exclusive Patterns  
by *Clipsy*

1254

Molded and Flared Lines Dominant  
Fashion cuts her collar high and her sleeves long, and both will find charm and distinction to your frock. The simple severity of the erect collar is youthful and imparts chic to this frock; the upper part of which is fashioned on princess lines, closing at the left shoulder under a row of tiny buttons. There is plenty of movement as Lelong would have it, in the cut of the circular skirt. The model pictured here emphasizes the vague for color and fabric contrast, the bodice being developed in satin or metal cloth and the skirt in velvet. Wide ribbon in a rich brocade design is tightly drawn about the hips before being tied in a loose bow at the left side. No. 1254 is in sizes 16, 18 and 20 years (or 24, 26 and 28 inches bust only). Size 18 years (36 bust) requires 4½ yards 36-inch, or 4½ yards 54-inch material. The waist requires 2½ yards ribbon, 5 inches wide. Price 30 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

## Thoughtful Mothers GIVE THEIR CHILDREN SCOTT'S EMULSION OF VITAMIN-RICH COD-LIVER OIL EVERY DAY

## ON THE AIR

What Is Doing in the World of Radio

A good record for daylight reception was made by K. T. C. Pacific in California when he heard KFI of Los Angeles broadcasting a football game. The broadcasts of the game began at 12:30 in the afternoon.

R. H. Skinner, of New York, set up his radio receiving apparatus at the base of the Sphinx in Egypt and heard his wife, talking in Pittsburgh, according to the Westinghouse Manufacturing Company.

A 30-kilowatt transmitter is being installed at Ft. Leavenworth, to make this the key to the entire radio communication system of the United States Government. It is one of the most powerful stations in the country.

An important investigation just completed under the direction of George K. Burgess, director of the United States bureau of standards, shows less harmful effects from high power broadcasting stations than had been expected by this bureau.

A new record for amateur radio communication is believed to have been established by a Vancouver amateur, Earl Chang, when he was in communication with a ship lying in Discovery Inlet, Antarctic Ocean, more than 10,000 miles away, for more than fifty minutes.

In 1923 there were 2,500 radios on farms. In 1925 the number increased to 550,000. Furthermore, the farmer is not a buyer of cheap sets. In 1923 the average price paid was \$125. In 1925 the high price sets were still the best sellers to farmers, says Good Hardware. Sets selling from \$125 to \$400 were better sellers than the \$100 sets.

**Its Quality Sells It.**—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing chiefly to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds and various inflammations, it has set a record in its history beyond reproach.

**Millions of Years.**  
The human race has millions of years before it on this earth, according to Sir Oliver Lodge in a recent lecture on evolution. He indicated 125 million years that man has existed in communion with an unseen world.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites by the writhings and fretting of the child. Until expelled and the system cleared of them, the child cannot regain its health. Miller's Worm Powders are prompt and efficient, not only for the eradication of worms, but also as a toner up for children that are run down in consequence.

**Was in Glee of Lucknow**  
—Mrs. William Moss, of Great Yarmouth, Eng., who just celebrated the 53rd anniversary of her wedding, is one of the few living survivors of the siege of Lucknow by the Indian mutineers in 1857. She was only seven years old at that time.

## She Could Never Do The Things Other Girls Did

Miss E. J. Rose, Rockland, Alaska, writes: "I am only twenty years old, but have suffered from heart palpitation and nerve trouble for several years.

I could never do the things other girls did, that is, in the line of sports, skating, etc., and could never depend on myself at work.

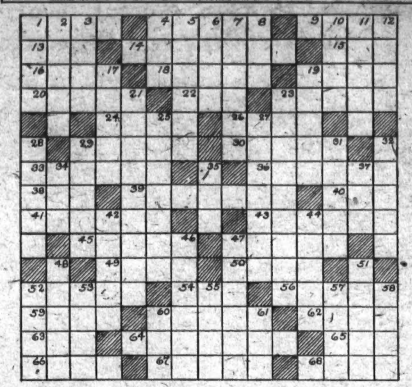

About six months ago I began taking

and am just twice the girl I was, and can enjoy everything in general life so much more. I am very grateful for what your pills have done for me.

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

31—Bait.  
32—Main factor.  
33—Upset.  
34—A hot lettuce.  
35—Solitary.  
36—Arrived.  
37—Twelve o'clock.  
38—A plant.  
39—Stalk of a plant.  
40—Diastolic signal.  
41—A beverage.

## SUNDAY SCHOOL LESSON

FEBRUARY 28  
JESUS TEACHES RESPECT FOR LAW

Golden Text: Think not that I came to destroy the law or the prophets: I came not to destroy, but to fulfill. Matt. 5:17.

Lesson: Matthew 22:15-32.  
Devotional Reading: Psalm 1.

## Explanations and Comments

The Clever Question and Its Purpose verses 15-17.—The Pharisees were now resolved to compass the death of Jesus. They had no power to order him put to death, and so they discussed among themselves the method by which they could accomplish their object. They decided to make an attempt to ensnare him in his talk, hoping he would say something which they could report to Pilate as treason and thus secure from the Roman Governor his death sentence. And, indeed, two days later they falsely said to Pilate, "We found this man perverting our nation, and forbidding to give tribute to Caesar." Ex. 22:2. Craftily keeping themselves in the background, they sent their disciples together with the Herodians, to question him. The Herodians were a sect of the Roman rule, but favored the kingdom of the house of Herod and meant to be on good terms with the government at any cost.

This alliance of Pharisees and Herodians, who hated each other, shows how supremely great was their common hatred of Jesus. Christ hated and it will in time absorb all other feelings, and will expel itself, not upon the object of your hatred, but in the ruin of your soul.

## Double Bodyguard For Prince

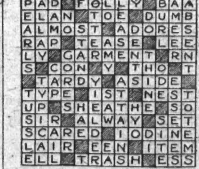

The personal bodyguard of the Prince of Wales has been doubled, and now consists of six picked men. The authorities give no reasons for having such complete protection for the Prince, whose name stands as strong and more important than that of any other of the royal family.

The men are under instructions to remain close to the Prince at all times when he is in public.

All mothers can put away anxiety regarding their suffering children when they have Miller's Worm Expeller to give relief. Its effects are sure and lasting.

A process for rolling metal foils so thin that they are transparent yet retain their elasticity has been invented by a German scientist.

## Answer to Last Week's Puzzle

## Would Lower Duties

Reduction in Duty On Automobiles Is Believed Certain

Conference between Liberal and Progressive members regarding the 1926 budget has been inaugurated and it is understood that already there is some agreement on some features. It is believed as practically certain that there will be a reduction in the duty on automobiles and that this will constitute the principal change in the tariff schedule.

In addition, it is learned, the Progressives have asked for reductions in other commodities, including pumps and pump pipes, lubricating oils and farm tools.

## Self-Poisoning Takes Huge Toll

Many Fall in Life Through Neglect of Fundamental Rule of Health

Thousands of men and women are daily victims of their own neglect. Greasy, listless, quickly tiring, suffering from headaches and biliousness, they spend enormous sums in medicines without avail. They would give much to regain their old vitality.

Can it be done? Yes! How? Simply by recognizing the importance of one fundamental rule of health—the proper elimination of the bowel contents. Poisons are allowed to remain in the system quickly lower the machine, weaken the nerves and thus pave the way to ill health. Stop this self-poisoning by taking Nujol—the scientific lubricant that completes the work of Nature's lubricant when, through modern living conditions, the natural supply fails.

Nujol can be taken indefinitely without injury to the system. Try Nujol today. Ask for it at your nearest drug store, but remember there is only one Nujol. Watch for the name "Nujol" in red on the label and package.

## SAY EASTBOUND GRAIN RATES NOT COMPLIED WITH

Ottawa.—When the board of railway commissioners were urged to deal promptly with eastbound grain and flour rates to Port William, Commissioner Boyce declared that it was a claim for preferential treatment outside the general rate investigation.

The incident occurred when W. H. McEwen, counsel for Saskatchewan, declared that the order of the board issued last June fixing the eastbound grain and flour rates, was not being complied with by the railways. It was an application for Canadian Pacific Railway main line rates to be applied generally on western lines.

If the railways were not living up to the order issued by the board, then the remedy was under the Railway Act, declared Commissioner Boyce. A new order would not make any difference, said the commissioner.

Mr. McEwen claimed that "the Crown's right of transportation" had been "cleared up," the province of Saskatchewan had been continuously involved in the thing since 1923. Commissioner Veen sustained the claim of the Saskatchewan counsel that he had the right to make an application to insure that the order was complied with.

## Had No Intention Of Offending Canada

English Magistrate Did Not Regard Dominion As Penal Colony

Birmingham, Eng.—Magistrate S. E. Short, in an interview with the Canadian Press, expressed surprise that against his judgment recently in giving a prisoner a choice between being sent to jail or going to Canada, Magistrate Short told the Canadian Press he thought the advice given to the prisoner to go to Canada was the best for the man and good for Canada, as the person in question was the type of man who would make a valuable contribution. The man had never been convicted, the magistrate continued, was well built and sturdy, and was of the kind that would be capable of righting himself in a country where a healthy outdoor life and hard work were essential to success.

He said he had not the slightest idea of offending Canadian susceptibilities when he suggested that the accused should choose to go to Canada and make a fresh start in life.

A protest against Magistrate Short's action was voiced in the House of Commons at Ottawa by J. R. Woods, worth, Labor, North Centre, Winnipeg.

## Red Delegates Must Explain Expenditures

Spent Millions of Gold Rubles and Accomplished Little Say Soviets

Leningrad.—A group of delegates, representing many countries, have arrived at Moscow to attend the annual communist convention.

Parades, receptions and "at the theatres" in honor of the delegates are noticeably absent this year. The attitude of the delegates is subdued, according to the Moscow papers.

Under pressure of M. Djerjinski, head of the all-powerful state police—the Cheka—the Communist party has decided to call the delegates to an accounting. Most of the sessions of the conference will be devoted to reports on how the appropriations have been spent during the last year. The Soviet papers are unable to understand why the millions of gold rubles failed to produce any noticeable revolutionary activity abroad.

Already the Scandinavian communist party has been notified that they no longer will receive Moscow's financial assistance. Subsidies in all the other European communist parties face a radical reduction.

### May Get New Post

Ottawa.—Appointment of Hon. G. F. Graham, minister of railways, as chairman of the board of directors of the Canadian National Railway, is said to be under discussion. At present Sir Henry Thornton is both president and chairman. Should Mr. Graham be appointed, Sir Henry would retain the presidency.

W. N. U. 1617

## Predicts Large Surplus

Premier Brownlee of Alberta Briefly Outlines Policies of Government

Edmonton, Alta.—In his maiden speech in the legislature as premier, Hon. J. B. Brownlee predicted a surplus of \$188,019 in the provincial funds of Alberta for the fiscal year 1936, the second largest in the history of the province.

In replying to the charges of Hon. C. R. Mitchell, leader of the opposition, Premier Brownlee, after first expressing the view that the province is on the verge of a great era of industrial and agricultural expansion, and laying down the policies which he regarded as essential for the encouragement of this expansion, finally repudiated Mr. Mitchell's charges against the Farmers' government of indecision, mismanagement and ill-directed legislation.

Among the points which Premier Brownlee gave as his policy essential to expansion along industrial and agricultural lines were the following:

First: Continued encouragement of co-operative marketing such as shown in the wheat, dairying, cattle, egg, poultry and other farm products pools.

Second: Extension of markets for agricultural products and coal.

Third: Creation of an adequate system of farm loans.

Fourth: Better freight rates on Alberta resources such as grain and coal.

Fifth: Development of the western rail route and Alberta representation on the Vancouver harbor board.

Sixth: Control of the natural resources.

Seventh: Greater co-ordination between government and industry as exemplified by the coal control which is endeavoring to solve Alberta's coal problems.

Eighth: Continuation of a policy of government economy and setting up of an adequate sinking fund.

Ninth: A sound immigration policy.

## Paying War Debt

Britain to Pay \$160,000,000 of U. S. War Debt This Year

London.—Night Hon. Winston Churchill, chancellor of the exchequer, told a questioner in the House of Commons that Great Britain's net payments to the United States on account of her war debts would amount to \$233,082,000 (about \$160,000,000) principal and interest during 1936, assuming sterling at par value.

Against this, he said, Great Britain would receive approximately \$14,900,000 (about \$68,000,000) from German reparations and payments on the allied war debts already funded. Mr. Churchill added that negotiations were proceeding for settlement of the remaining allied war debts.

## Recruiting In Britain Shows Slight Decrease

Emigration Is Competitor According to War Office Report

London.—That emigration is seriously competing with recruiting is emphasized in the annual report of the war office. Recruiting, however, showed a marked improvement last year. London and Northern Ireland maintaining their reputation of providing larger contributions to the army than any other countries. Emigration is a serious matter in Scotland and the eastern counties, the report says, although its effect on recruiting is felt generally throughout the country.

## Russian Torturers On Trial

Seventeen Charged With Death of Eleven Persons During Famine

Sverdlovsk, Russia.—Two brothers named Muslumov, and fifteen others, were placed on trial here on charges of torturing eleven persons to death and seriously maiming forty-nine others. The crimes occurred during the famine period, but were only recently revealed.

More than one hundred witnesses have been called. One of the Muslumov brothers was chairman of the local committee for suppression of banditry, and the other was chairman of the Soviet of his village.

Escaped Injury In Plane Crash

Melbourne, Australia.—The Governor-General of Australia, Lord Stonehaven, had a miraculous escape from death while flying from the Flinders naval base. The airplane crashed into a tree, but the governor-general was not injured.

## FUEL SHORTAGE IN ONTARIO IS AIRED IN HOUSE

Ottawa.—Further inquiries in regard to what action the government proposed to take in order to insure fuel supply for Ontario during the remainder of the winter were made in the house. J. E. Armstrong, Conservative, East Lambton, read a telegram from a dealer who complained that he was unable to obtain Alberta coal, and that there was danger of a serious shortage involving schools and public buildings in Western Ontario.

Mr. Armstrong said he was at a loss to understand why the government did not act. It was no use telling the members that they had to look to the Ontario fuel controller. There were protests from Liberal members, who objected to any discussion of the matter on the orders of the day, and Mr. Armstrong said that, if necessary, he would move the adjournment of the house to discuss it.

Hon. Charles Stewart, speaker of the Interior, replied that action would be taken by the federal authorities on the request of the fuel controller of Ontario. "So far as I am aware we have received no communication from the Ontario fuel controllers," he added.

## Many Killed In Snowslide

Buildings In Utah Mining District Crushed Under Debris

Salt Lake City, Utah.—Several buildings, including the Methodist church, were buried under a snowslide in Sap Gulch in the Highland Boy mining district near Brigham, 15 miles south-west of here, Feb. 17.

Estimates of those entombed in the avalanche of snow, rock and brush that slid down the mountain side range between 50 and 100.

Little hope is held out for their rescue.

Fire burning in the buildings which were buried under hundreds of tons of debris imperilled the safety of those who may have escaped instant death when their homes were crushed.

## Do Not Want Eight-Hour Day

Organization threaten to give the government a troublesome time if the proposals that henceforth the new members of the civil service shall work eight hours a day instead of seven hours, as at present is adopted. This is one of the tentative methods of government economy now under consideration by the cabinet.

Mexico Excludes Priests Vera Cruz.—Governor Jara has ordered all the municipalities in the state of Vera Cruz to act upon the requirements of the Mexican constitution and exclude alien priests and close all Roman Catholic schools.

Encountered Severe Storm New York.—The British freighter Errington Court, after battling three violent storms on the North Atlantic and losing her first officer, arrived here from Swansea with a cargo of an erratic coal. The voyage took 31 days.

Pretty Lady At Wheel of Liner.

One of the prettiest of the five hundred passengers on board the Canadian Pacific liner Montpelier, which left New York recently for a twenty-day cruise of the West Indies, Mrs. Louis Mitchell, of New Bedford, Mass., was snapped standing near the "wheel" just before the vessel left New York harbor. Mrs. Mitchell was one of the party of forty-one members of her association, the Northeastern Retail Lumbermen's Association, who went on the trip to the Land of Perpetual Sunshine.

## Canada's Stand On Peace Pact Important

If Not Bound, Dominion Could Remain Neutral In Event Of War

London.—Commenting on the report which has been officially denied that the Canadian government had decided to introduce a resolution in the House of Commons at Ottawa declaring that Canada dissociates herself from the obligations imposed by the Locarno pact, The Daily Herald says that this decision, if true, marks a very definite state in the evolution of the British empire.

It is already recognized that each self-governing part of the empire may make treaties on its own account but the Locarno treaties are not in the same category as those which have been so far separately negotiated, the paper says.

"They are treaties involving the obligation to go to war under certain circumstances. If Britain is thus bound and Canada not, we are faced by the remarkable possibility that one part of the empire may be at war and the other not—that Canada may be neutral in a war in which Britain is a belligerent."

## New British Cruiser Launched

Details of Construction Were Kept a Close Secret

Portsmouth, Eng.—Two unusual incidents occurred here at the launching of the cruiser Suffolk.

Lady Bristol, who performed the christening ceremony, made six efforts to break the champagne bottle across the bow before she was successful and when the control rope was severed the vessel refused to budge. The suspense was considerable, but it ended with a burst of applause a minute or so later when the huge bulk was seen to start its glide seaward.

It was the first launching of a warship at Portsmouth in five years.

Details of the construction of the Suffolk have been kept a close secret. All that is known is she is 10,000 tons, has 18 guns, is turbine-driven and has a speed that will probably exceed 30 knots. The cost was £2,000,000.

## Wanted American Ship

New York.—An SOS call which specified "only American-bound ships need apply," is reported here. The message was sent by the British steamer Olyvick, which had gone to the rescue of three men in a disabled motor boat in West Indian waters. The men refused to be rescued by a ship bound for London and drifted for another ten hours until a United States vessel happened along.

Encountered Severe Storm New York.—The British freighter Errington Court, after battling three violent storms on the North Atlantic and losing her first officer, arrived here from Swansea with a cargo of an erratic coal. The voyage took 31 days.

## WOULD APPOINT COUNSEL FOR CUSTOMS PROBE

Ottawa.—R. L. Calder, K.C., Montreal, will probably be appointed counsel for the whole committee conducting the customs' administration inquiry.

Decision to engage one counsel for the committee as a whole has, it is understood, been decided upon by members of the committee.

Prison-made shirts from the United States are being sold extensively in Canada, having been smuggled in without payment of duty. It was suggested at a sitting of the customs probe by R. P. Sparks, president of the Commercial Protective Association. Mr. Sparks produced in evidence a shirt which he had bought in Ottawa, and which he believed to have been made in a penitentiary in the United States. He also filed a list of American firms dealing in prison-made apparel at prices which went as low as 65 cents a dozen shirts. There was a growing prejudice in the United States against these articles made by prisoners and those who dealt in them were turning to Canada for an extended market, said Mr. Sparks. These goods could not enter Canada legally.

## School Trustees' Convention

Large Attendance of Saskatchewan Trustees at Regina Gathering

Regina.—Education in its various phases as taught in the schools of the province was criticized, commended and debated by the 800 delegates attending the annual convention of the Saskatchewan School Trustees' Association.

Stressing the need for an examination of Saskatchewan schools, C. E. Little, Ogema, president of the association, declared that agricultural instruction was not sufficiently emphasized in the present curriculum.

Mr. Little was severe on the college of agriculture, which he declared had failed to meet the needs of agriculture.

The high school conference went on record as saying that the cost of secondary education should be borne by the people as a whole and that the principle of charging fees in schools doing high school work was detrimental to the best interests of education and a "retrograde movement."

Unanimous assent was also given to a resolution urging that all construction necessary to the development of the Hudson's Bay route should be proceeded with immediately. This resolution is to be sent to Sir Henry Thornton, to the federal minister of railways and right Hon. W. L. Mackenzie King, "member for Prince Albert." This gives the trustees' association the distinction of being the first organization to address Premier King by his most recent designation.

## World Marketing Plan

Representatives of Co-operative Wheat Pools Discuss Details at St. Paul

St. Paul, Minn.—Details of the plan for an international wheat pool organization were under discussion here at the conference of representatives of many co-operative wheat pools.

The Russian wheat marketing situation and the manner in which it might be included in a world-wide marketing plan was outlined to the conference by D. P. Taylor, official trade delegate of the Soviet union.

Conference sessions have been open only to official delegates and only the general plans of the conference are being made public.

## Estonians Are Sentenced

Charged by Bolsheviks With Plotting Against Soviet State

Riga, Latvia.—Fifteen Estonians charged with espionage have been sentenced to death at Leningrad, Russia. Their trial had been going on for the several days.

The trial of 48 Estonians began February 2 before the provincial court in Leningrad. They were charged with plotting against the Soviet state and planning to blow up Russian munition plants, bridges, airfields and other structures.

Plain. 87

## S.S. "ONTARIO" FIRST UNIT IN ALL-CATTLE TRANSATLANTIC FLEET

A NEW era in Canada's export cattle trade is believed to have been begun with the organization of the Livestock Steamships Limited for the purpose of operating a fleet of all-cattle boats from eastern Canadian seaports to Great Britain. The first boat ever designed solely for the transport of cattle, the S.S. Ontario, sailed from St. John on January 24th with a cargo of 1,158 Canadian cattle for Glasgow. The sailing of this steamship, which is shown above, marks not only the inauguration of an entirely new type of cattle boat and the advent of a new steamship line serving between Canadian and British ports, but also, in the opinion of export cattlemen present, a significant movement towards enlarging the cattle export trade of the Dominion and the placing of the Canadian exporter in a position where he will be able to compete on more equal terms with his Irish competitors.

The formation of the new line, which is known as the Livestock Steamships Limited, is due to Mr. H. P. Kennedy, president of the Livestock Producers of Canada—probably the largest exporter of cattle in the Dominion—and Albert Jensen, steamship operator of Copenhagen and London. With them are associated in the venture a group of men in Toronto, Winnipeg, Edmonton and other parts of Canada. Mr. Kennedy is shown in the group of pictures above. Beside him is a scene on board the S.S. Ontario, showing the loading of feed for the first cargo. While the photograph at the top is of a group of cattle on one of Mr. Kennedy's feed lots adjoining the Canadian National Railways at Edmonton, where many hundred head of cattle have been prepared for export during the past two years under his supervision.

The "Ontario" is the first of four sister ships to be placed in operation immediately and is equipped to carry cattle on five decks. All decks are of steel and cement construction and access is had to each by runways and elevators. Each deck is divided into a series of stalls, each of which accommodates four animals. Ventilation is provided by a series of turbine ventilators, which produce a complete change of air on every deck every six minutes. The schedule calls for a round trip by the "Ontario" every 27 days and the cattle industry of Canada will be able to control the steamship to any desired port, thereby ensuring to the shippers the best market prices.—C.N.R. Photos.

### Stony Plain and District.

Mr Geo Smith of Red Deer is up visiting with his brother, Jags Smith.

The local Rifle Club held a very successful Smoker and in Duchofke's Hall last Thursday evening. Everything went well, including the 24 gallons.

A 12-reel picture show will be presented in Duchofke's Hall next Monday evening, March 1st. Don't miss it.

The Girls' Club are holding a card party in the Town hall tomorrow evening. Everybody Welcome.

At the present time it looks as if the winter is about all over and with spring in the advent.

Automobiles are coming into town in wholesale fashion. John H Miller got in a carload of Fords; Summerfield a carload of Chevrolets and R Speakman a carload of Stars, all this week.

The annual meeting of the Liberal Association of this constituency was held in Duchofke's hall yesterday afternoon. J Hefferman, the Edmonton M.L.A. and Mr Ray were the principal speakers for the occasion.

The Provincial Dept. of Agriculture will hold a short course in Agriculture in Stony on Friday and Saturday, March 12 and 13. Everybody is welcome, so make it a point to attend.

The Masquerade Dance at Holborn on Friday night drew a large crowd of dancers from the surrounding districts with a very elaborate display of costumes. The prize winners were as follows: Best dressed couple, Mr. and Mrs A Anderson. Most Original, Miss Inkster and Ralph Washburn. Comic, Mr and Mrs Leslie Barker. The music was furnished by Dixons' Orchestra from across the river, and is claimed to be the best ever heard there.

The season for trapping muskrats opens on Monday, March 1st and continues until April 30; only north of North Saskatchewan River. A Trapper's License is required for the catching of muskrats and same may be obtained at the Sun Office.

### SPORTING NOTES.

The big Edmonton Bonspiel is on in Edmonton and sad to relate Stony has no representatives this year.

The Eskimos have finally won a game from Saskatoon in Edmonton much to the gratitude of local fans which attended Monday evening.

The Stony Plain hockey team are negotiating with a good City team for a game in Stony on Sunday, Feb 28, that is, providing there is such a thing left, as ice. But at the time of going to press, nothing definite has been arranged and as soon as their is, notices will be posted.

### News Briefs.

A complete equipment has been installed in the University of Alberta at Edmonton, for the purpose of testing and grading wheat for milling and to test the different varieties for baking qualities. Wheat from all the different districts will go through an investigation to determine the quality of wheat grown there and improvements in variety where necessary will be suggested.

It has come to the attention of the Alberta Dept. of Agriculture, that a large percentage of grain in the Province is displaying poor germination qualities. It is most important that, before seedling commences, the farmers should have their seed thoroughly tested for germination. This can be done for a nominal fee by sending samples to the Dominion Seed Branch Office at Calgary.

700 British settlers are due to arrive in Alberta in April, under the new Immigration plan of the Imperial and Canadian govts.

Norwegians and descendants in Canada will hold a celebration at Camrose, Alta, the coming summer, dates July 3, 4, 5 and 6.

Premier Brownlee, during his address in the Legislature Tuesday last, announced that the provincial budget had been balanced for 1925, and that there would be a surplus of \$188,000, the second largest in the history of the province.

The Edmonton Spring Show will be held this year April 5-10. Entries for the bull sale close on March 21 and the Show-Classes entries close on March 19.

Figures from the 1925 report of the Workmen's Compensation Board, which was tabled in the legislature, shows that since the act became effective in 1918, there has been paid as compensation to workmen in Alberta, a total of \$1,882,275. There has also been act aside the sum of \$1,718,129 for permanent disabilities.

### Here and There

Salmon exports from British Columbia amounted to 1,871,000 cases, the record for several years past. Shipments in 1924 were 1,635,000 cases; 1923, 1,820,000 cases; in 1922, 704,000 cases in 1922 and 939,000 cases in 1921.

For the first time in Canada, a sport known as the "mountain glissade," was performed at Revelstoke, B.C., on Friday, January 23, before hundreds of visitors to the start of Revelstoke's twelfth winter carnival. "Glissading" consists of flying down rough uneven mountain sides on skis.

From August 1, 1925, to January 31, 1926, 3,182,198 bushels, or about one and a half per cent of the 19,637,112 bushels of grain shipped by the Canadian Pacific Railway by the all-rail route. About one-eighth, or 30,216,134 bushels travelled through the port of Vancouver and the balance of 85 per cent was shipped via Port William.

Five hundred Montreal school children will give a concert on the concluding night of the triennial conference of the National Council of Education, to be held in Montreal from April 5 to 9. The speaker for the occasion will be Sir Walford Davies, well known authority on national and school music.

Under the auspices of the French Government, the French universities and Hon. Philippe Roy, commissioner-general of Canada in France, a tour through France has been arranged for this summer, starting in Quebec on May 25 with the departure of the Canadian Pacific liner Empress of Scotland.

Pulp and paper exports from Canada during 1925 were valued at \$164,555,951, as compared with \$139,491,469 for the previous year. Newsprint production for 1925 was estimated at 1,816,000 tons, as compared with 1,852,994 tons for 1924. This is twice the newsprint production of 1918.

With glorious weather prevailing, a large gathering witnessed the opening of the tenth annual Banff Winter Carnival on February 3. "Queen Gabrielle" regally entered in a fairy ring gorgeously formed by frost crystallizing ice, drawn by a team of huskies. Shooting, skiing, skating, hockey and hikes featured the big winter sport tournament.

Two more cases of automobiles crashing through gates at level crossings at Chelsea Road, Hull, Quebec, have been reported. On January 6, an automobile bus, laden with passengers, was driven through both gates. The driver explained that his windshield was frozen. The second case occurred February 3 when a car ran past just as the gates were being lowered. Both cars were damaged.

Addressing the members of the Canadian Lumbermen's Association at their eighth annual convention banquet at Montreal recently, E. W. Beatty, K.C., President of the Canadian Pacific Railway, stated that the 1925 income tax would collect from \$42,000,000 to \$48,000,000. Mr. Beatty declared that a reduction of 25 per cent, or \$11,000,000 might be brought about if the government expenses were cut. The Canadian Pacific Railway had reduced its expenses by over double that amount in one year, and the railway company was not as large as the Dominion of Canada.
